Following healthy lifestyle habits by teenage students

Recently I have done a research about following healthy lifestyle habits by teenage students of my school. The data I have collected is pretty fascinating. As you can see by the graphics major part of students actually follows these habits. For example about 45% of boys and about 85% of girls do not smoke and drink alcohol. I think these statistics are pretty good but of course they could be better. Also about 88% of boys and about 54% of girls do exercises and sports. Otherwise there are some bad reports. Only 20% of boys and 30% of girls sleep healthy and at least 8 hours. That is not good at all because healthy sleeping is very important. Problems with sleep often cause dangerous diseases. I want to compare this statistic to data of using cell phones and computers. Only 3% of boys and 5% of girls reduce their time on cell phones or computers so it's not surprising they don't sleep enough. Also if we compare data on doing sports and data on weight control we can see that girls are less interested in sports than boys. I would like to recommend them do sports more often since it will help them to stay fit and healthy. For boys I would like to recommend eat less fast food and try to stay on balanced diet. In the conclusion I would like to say that students of my school have a lot of habits to get off but I think they will do it to live a happy healthy life.
